DETAILED ACTION

This action is being sent in response to a call from the Attorney of record Tom Jackson to insert a the missing wording in the reasons for allowance

Allowable Subject Matter

1. Claims 1, 8, 9, 13, 20-21, 25-26, 28-30, and 32 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art teaches a process for forming a polar film on a surface of an organic film where the film is formed of silicon, carbon, hydrogen and oxygen; modifying the film to impart an affinity by irradiating with electron beams in a rare gas atmosphere such as argon by exposing the film to a first pressure and imparting an affinity at a second pressure; applying a polar liquid to the surface of the organic film.
3. The prior art reference Gallagher et al. provides examples of treating the film using heat where the resulting contact angle is 68°. However, Gallagher et al. fails to teach or show examples of obtaining angles less than 58 degrees. Furthermore Ross does not state how the electron beam treatment changes/ decreases the contact angle of a silsesquioxane film to be below 58°. Therefore the prior art fails to teach treating the film comprises of silicon, carbon, hydrogen and oxygen with electron beams in order to provide the surface with a contact angle of less than 58°.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
